

How to access Digital Welcome API's

`hostname:port/api/v1/<endpoint | command>` or `hostname:port/api/v1/<endpoint | command>/:id`

Available endpoints

- *contacts*
- *rooms*
- *meetings*
- *checkins*
- *digitalSignage*
- *webexDevice*

Available commands

- *notifyCheckin*
- *notifyTeams*
- *notifyEmail*
- ~~*NotifySms – Work in progress*~~
- *signageContent*
- *callConnect*

CONTACTS /contacts	CREATE UPDATE	_id	name		email	type	phone	photo	date
			firstName	lastName					
		String (24)	String	String	String min(11)	Number min(1).max(5)	String min(10)	Buffer	Date
	READ	/:id							

ROOMS /rooms	CREATE UPDATE	_id	name	seats	table	whiteboard	video	videoType	photo	location	tags
		String (24)	String	Number	Boolean	Boolean	Boolean	String	Buffer	String	String Array
	READ	/:id									

MEETINGS /meetings	CREATE UPDATE	_id	date	subject	hostId	visitorId	roomId	participants	tags
					contacts._id	contacts._id	rooms._id		
		String (24)	Date	String	String (24)	String (24)	String (24)	String Array	String Array
	READ	/:id							

CHECKINS /checkins	CREATE UPDATE	_id	date	visitorId	meetingId
				contacts._id	meetings._id
		String (24)	Date	String (24)	String (24)
	READ	/:id			

WEBEX DEVICES /webexDevices	CREATE UPDATE	_id	name	model	ip	username	password	defaultCall	date
		String (24)	String	String	String	String	String	String	Date
	READ	/:id							

DIGITAL SIGNAGE /digitalSignage	CREATE UPDATE	_id	name	model	ip	username	password	defaultContent	date
		String (24)	String	String	String	String	String	String	Date
	READ	/:id							

hostname:port/api/v1

Information type

- String - () is the number of characters
- String Array - [{"value1", "value2", ... }]
- Number - Integer value
- Boolean - true or false
- Date - yyyy/mm/dd hh:mm:ss
- Buffer - Binary stream
- /:id - URL parameter

CHECKIN <i>/notifyCheckin</i>	CREATE	/:id (checkin)
		String (24)

TEAMS <i>/notifyTeams</i>	CREATE	email	message	file	filename	token
		String Array	String	Buffer	string	String (64)

EMAIL <i>/notifyEmail</i>	CREATE	email	subject	message
		String min(11)	String	String

SMS <i>/notifySMS</i>	CREATE	email	subject	message
		String min(11)	String	String

DIGITAL SIGNAGE <i>/digitalSignage/:id/ signageContent</i>	CREATE	/:id (signage)	content
		String (24)	String

WEBEX DEVICES <i>/webexDevices/:id/ callConnect</i>	CREATE	/:id (webexDevice)	command	contact
		String (24)	String	String

hostname:port/api/v1

Information type

- o **String** - () is the number of characters
- o **String Array** - {[“value1”, “value2”, ...]}
- o **Number** - Integer value
- o **Boolean** - true or false
- o **Date** - yyyy/mm/dd hh:mm:ss
- o **Buffer** - Binary stream
- o **/:id** - URL parameter
